Operation 'Clean Desert'

As part of this operation, the organisers have committed themselves to meticulously cleaning up the bivouac sites and to ensuring that the trails are restored to their original state at the end of the rally.

In addition, each crew will be given a bio-degradeable plastic bag at the start of each stage. This ensures that not only will all of the participants' litter be collected, but also that if a bag happens to get left behind in the desert, it will naturally and rapidly degrade without having any negative effect on the environment.

All of the Road-books are printed on recycled paper.
