At a reception organised by Deloitte on Monday 8 July, Enguerran et Thomas (Crew 606 of the 11th event) were awarded the Deloitte 4L Eco Challenge 2008 prize for the project they undertook during the 4L Trophy 2008, which featured several different 'green' initiatives.

Most notable was the installation of a solar panel on the roof of their 4L. This photovoltaic installation was then installed on the roof of a house belonging to a Moroccan family who live in the Merzouga region.

Congratulations to everybody on all their initiatives, which combined humanitarian concern with respect for the environment.

We hope that future rally participants will likewise sign up for the Deloitte 4L Eco Challenge and take action on behalf of the environment!
